

Blinkit Sales Analysis Dashboard – Power BI Project Report

Project Overview

The Blinkit Sales Analysis Dashboard is an interactive Business Intelligence solution developed in Microsoft Power BI to analyze sales performance, customer ratings, inventory distribution, and outlet performance. It converts raw sales data into meaningful insights for decision-making.

Problem Statement

Blinkit operates multiple outlet types, locations, and product categories. The dashboard identifies top-performing outlets, product categories, customer satisfaction, and sales trends.

Business Requirements

Monitor Total Sales, Average Sales, Number of Items, Average Rating, Outlet Performance, Sales Distribution, and High Performing Categories.

Project Objectives

Analyze revenue, compare outlet types, evaluate outlet performance, analyze item categories, monitor ratings, identify trends, and build an interactive dashboard.

KPIs

Total Sales: 1.20M
Average Sales: 140.99
Number of Items: 9K
Average Rating: 3.92

Visualizations

Donut Chart, Bar Chart, Line Chart, Funnel Chart, Matrix Table, KPI Cards and Interactive Filters.

Workflow

Requirement Gathering → Data Walkthrough → Data Connection → Data Cleaning → Data Modeling → Data Processing → DAX Calculations → Dashboard Development → Insights Generation.

Tools & Technologies

Power BI, Power Query, DAX, Excel, Data Modeling.

Key Insights

Tier 3 outlets generate the highest sales. Medium-sized outlets perform best. Supermarket Type 1 is the top-performing outlet type. Fruits & Vegetables and Snack Foods are the leading categories. Outlets established around 2018 generated peak sales.

Business Recommendations

Increase inventory for top-selling categories, expand medium-sized outlets, strengthen Tier 3 operations, improve low-performing categories, and maintain customer satisfaction.

Skills Demonstrated

Power BI, DAX, Power Query, Data Cleaning, Data Modeling, Dashboard Design, Business Intelligence, Data Visualization, KPI Development, Business Analysis.

Conclusion

This dashboard provides comprehensive business insights using interactive visualizations and KPIs, enabling stakeholders to make informed data-driven decisions.
